

Internship offer (6 Months) - ESG Analyst

Iceberg Data Lab is a Fintech developing data solutions to help financial institutions assessing their environmental impact with a strong focus on biodiversity, climate, and pollution prevention and control.

Faced with growing demand from regulators and stakeholders and mounting environmental risks, Financial institutions need reliable data solutions. We help them (1) measuring their environmental impact and (2) aligning it to their ESG goals.

Missions and responsibilities:

- Assess companies and collect relevant data for environmental footprint calculation ;
- Work with the IT team on data collection;
- Calculate the environmental impact of corporates on different issues (biodiversity, climate, financial risk, etc.);
- Conduct a critical review of the results to explain the methodology and results;
- Support the Research team in methodological development.

Profile:

- Final year student of an Engineering Master's program,
- Scientific/engineering or economist background are preferred; however we are always pleased to meet alternative motivated profiles,
- You are attracted by Sustainability and the Sustainable Finance sector,
- Analytical skills, knack for figures and ability to work autonomously,
- Basic French knowledge is required, Fluent English a must.

As an ESG Data Analyst, you will have the opportunity to join a young, multidisciplinary and international team committed to accelerate the transition to a green, sober and fair economy. This is also an opportunity to develop sought-after skills (Life Cycle Analysis, Data Analysis, Impact assessment) and work in an innovative start-up.

We are looking for hard-working, motivated and rigorous professionals to join our team.

If you are interested, we are happy to hear from you! Please send us your resume and a cover letter, explain us what motivate you in Sustainable Finance and what would be your most important immediate contribution to our team and we will get in touch soon!

Job details:

The intern will be under the supervision of an Analyst.

Internship based in Paris. Internship may start as soon as possible and should last for no less than 6 (six) months.

Compensation varies depending on profile and experience. Possible hiring opportunities after the internship.
